Each IndeVet takes the Predictive Index (PI) Behavioral Assessment. The PI is an untimed, free choice, stimulus-response tool that helps us understand the personality traits that make our employees tick.

Dr. Brunetti's Predictive Index shows she:

- Is detail-oriented and conservative with a preference for high-quality work
- Has high standards and deep follow-through on tasks
- Is proactive and results-oriented
- Is autonomous, matter-of-fact, and precise
